

**RSCTC
2010**

**7th International Conference
on Rough Sets
and Current Trends in Computing
June 28–30, 2010, Warsaw, Poland**

28.06 Monday, 11:30

Roman Słowiński – Poznań University of Technology, Poland
New Applications and Theoretical Foundations of the Dominance-based
Rough Set Approach

28.06 Monday, 13:30

Sankar K. Pal – Indian Statistical Institute, Kolkata, India
F-granulation, Generalized Rough Sets and Entropy: Uncertainty Analysis,
Pattern Recognition and Applications

29.06 Tuesday, 11:30

Rakesh Agrawal – Microsoft Research, USA
Search and Data: The Virtuous Cycle

30.06 Wednesday, 11:30

Katia Sycara – Carnegie Mellon University, USA
Emergent Dynamics of Information Propagation in Large Networks

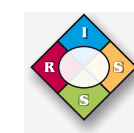

**Open Keynote Lectures
Auditorium, Old Library Building
University of Warsaw
Krakowskie Przedmieście 26/28**
